solids comprising a silicon- germanium- or tin-bridged Group IV, V, or VI metal-
containing metallocene complex; and

- 5) forming and heating a slurry of said solids at an elevated temperature in an aprotic,
polar solvent so as to extract impurities from said solids to said solvent and then
separating the impurity-containing solvent and the solids from each other.

REMARKS

Claims 1, 3-14, 17-24, 27-34, 36-43, and 45-48 are in the case.

The indicated allowability of Claims 16-20, 26-29, 36-39, and 46-48, if suitably
amended is noted with sincere appreciation.

The above amendment is believed to overcome each of the rejections under 35 U.S.C.
§ 103(a). By the above amendment each of the claims in remaining in the case contains at
least one patentably distinguishing feature set forth in the claims indicated to be allowable in
the Office Action. Thus Claims 1, 3-14, 17-24, 27-34, 36-43, and 45, set forth extraction of
the quenched reaction mixture with hydrocarbon having a higher boiling point or higher initial
boiling point than the ether, and distillation of the ether from the resultant extract such as
appeared for example in allowable Claims 16, 17, 26, 27, 36 and 37. It is believed therefore
that Claims 1, 3-14, 17-24, 27-34, 36-43, and 45 are patentably distinguished over the applied
references as the processes as now claimed in this group of claims are not shown, suggested
or rendered obvious by Plummer 4,528,408; Rohrmann EP 549,900; the excerpt from
"Organic Chemistry" by Morrison and Boyd; or Winter EP 659,757, however combined.

Claims 46-48, indicated in the Action to be allowable if rewritten in independent form
to include the limitations of the base claim and any intervening claims, have been so amended.
Thus these claims are also deemed allowable over the applied references.

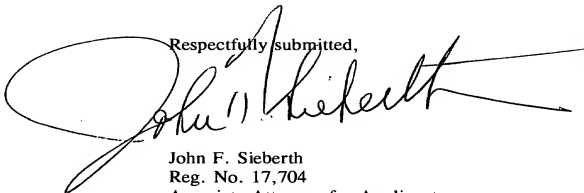

We wish to express our appreciation and compliments for the thorough and highly
professional manner in which the Office Action was prepared.

Accompanying this response are a form PTO-1449, a copy of each reference listed thereon, and a Deposit Account Order Form to cover the fee for the Information Disclosure Statement as called for by 37 CFR § 1.97(c) and § 1.17(p).

A formal Notice of Allowance is solicited.

If any matters remain that require further consideration, the Examiner is requested to telephone the undersigned at the number given below so that such matters may be discussed and, if possible, promptly resolved.

Respectfully submitted,

John F. Sieberth
